WORK EXPERIENCE

SENIOR ANALYST : SOFTWARE ENGINEER Jul2023-Jan2024
MERISTEM NG

Collaborated on a new mobile solution for potential investors using flutter.

Developed a probate tracking system for the investment arm of the business to help track customers investment portfolios and give updates on pending tasks, this helped the business carry customers along as they invested and awaited returns.

Collaborated on a customer facing web platform that helped onboard customers and give them insights on the best investment opportunities and market situation. Migrated the companies database to its own server reducing dependency on external service providers

PRODUCT LEAD MOBILE Feb2023-Sep2023
OPTIMUS BANK

Supervised the application team and distributed weekly tasks and tracked progress of each team members.

Enforced coding standards using linting tools and typescript to ensure clean code is delivered. and modularized codebase for ease of maintainability

Stabilized of core banking features on the Optiverse app, these include but not limited to: sign up, KYC, Change pin , transfer funds, change password, Bills payment and airtime recharge.

MOBILE APPLICATION DEVELOPER Aug2022- Jul2023
STANBIC IBTC

Collaborated with a large team of developers to build a mega banking application with 6 app modules that can be extracted to function independently and a singular application, each app for each service the banking group provides.

Assigned tasks within the group in collaboration with the project manager and ensure smooth work flow.

Enforced coding standards and code testing within each module using unit tests.

Reviewed PRs before approval and merging into the main code body

REACT NATIVE DEVELOPER Feb2022- Aug2022
ALADDIN DIGITAL BANK

Implemented new design to rebrand application from a loan app to a business market place that provides banking services and financial loans.

Implemented marketing features like "scan and win" and "spin and win" to help app marketing campaign and this increased app downloads by over 200 new customers monthly.

Revamped the Signup flow and dashboard to improved quality of user information collected and user experience when joining the platform. this led to more loan applications.

accomplished the yearly targeted 5% profit increase with the addition of travel and business loan features.
